

MediaStar Lite Editor

KEEPING TRACK OF YOUR PSIP & PROGRAM GUIDE

Easy Editing for PSIP and TitanTV Data Services

MediaStar Lite is a simple, yet effective program editor. The online system lets broadcasters make program level changes to their PSIP data files and TitanTV data services.

Publish Changes & Maintain Schedules

Using MediaStar Lite, broadcasters can edit multiple schedules through one access point, eliminating the hassle of juggling multiple accounts. Stations are able to add, edit and delete programs up to fourteen days in the future and instantly publish those changes to the stations' PSIP streams and TitanTV program guides.

Audio & CC Default Controls

Broadcasters have the ability to set and maintain audio and closed captioning (CC) defaults at the station level, ensuring that their PSIP data is always FCC compliant.

Access to the Global Program Library

MediaStar Lite users have exclusive access to the MediaStar Global Program Library (GPL), a robust database with over 2.6 million TV, movie and episodic records. GPL gives users the opportunity to build and manage custom program lists, turning individual program changes into a quick and painless edit.

With GPL, users can filter through their custom lists or search the entire database for additional programming by entering in the program or episode title(s).
